

# Designed to help you mitigate your risks

Technology is now a key component that helps businesses generate revenue, improve productivity, increase efficiency and enhance customer experience. However, with innovative new solutions, your business is also exposed to new attack vectors.

It is now not a matter of “if” your business will be breached, but a matter of “when”. Taking a proactive security approach can help to mitigate your risks of becoming a helpless victim.

While this approach can be complex, JOS’s team of security experts can help you simplify the process. We will work to help you select the best defences for your organisation — allowing you to focus on your core business with peace of mind.

## Business Challenges

Cyber criminals are now using highly sophisticated attacks when the victim is least aware.

Perimeter defence is not sufficient — data breach discovery typically occurs only 100 days later.

Costly security technology that do not fit your business may not deliver desired results.

Employees are the weakest link in an organisation's cyber defence, and are often the targets of social engineering attacks.

# Keep your organisation safe amidst the increasing complexity

Our broad enterprise security capabilities and consulting-led approach can help you navigate this complexity — enabling seamless digital transformation while minimising risk.

## 4 Reasons Why You Need Enterprise Security

- 1 Maximise business continuity
- 2 Enhance protection & productivity
- 3 React to security incidents timely
- 4 Minimise data breaches

### Network Security

Identify threats and stop them from entering your network by implementing an effective network security.

- Firewall
- Web Application Firewall (WAF)
- Mail & Web Security
- Intrusion Prevention System (IPS)

### Cloud Security

Safeguard users by detecting and preventing threats regardless of when and where they access cloud platforms (Azure, AWS, etc) and applications (Office 365, Salesforce, etc).

- Cloud Access Security Broker (CASB)
- DNS Security

### Advanced Threat Protection

Defend your business with a proactive approach that identifies and eliminates cyber threats.

- Advanced Threat Protection for Endpoint
- Web and Email Protection
- Advanced Malware Analysis
- Sandboxing Technology
- Zero-day Protection

### Identity & Access Management

Track and trace the actions of users within the network to reduce damages and ensure that you can trace and remediate data breaches quickly.

- Identity Access Management (IAM)
- Privilege Access Management (PAM)
- Network Access Control
- Single Sign On
- Multi Factors Authentication
- Software Defined Access

### System & Endpoint Protection

Protect your system and endpoint devices by exposing and remediating cyber threats quickly and effectively.

- Endpoint Security
- Data Centre Security
- Cloud Security
- Virtualisation Security
- Application and Device Control
- Application and Database Security
- Mobile Security
- Data Leak Prevention (DLP)
- Encryption

### Cyber Security Consultancy Services

Learn about your cyber security posture, stay prepared for incident response and conduct cyber awareness courses to better manage cyber risk.

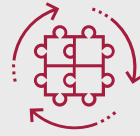

- Email Phishing
- Threat Intelligence
- Cyber Profiling
- C-suite Cyber Awareness
- Network Behaviour Analysis
- Incident Response Playbook
- Ethical Hacking
- Cyber Insurance

## Why JOS

One-stop Shop

JOS provides you with an end-to-end security solution from consultation to deployment and implementation.

Tailor-made Solutions

JOS's security experts can help define a customised and proactive security posture to manage complex requirement.

Security Expertise

JOS's security experts are familiar with industry regulations, and accredited with industry certifications such as CEH, ENSA, ECSA, eCPPT, OSCP etc.

Vendor Agnostic

JOS works with best-of-breed security partners to provide you with a tailor-made solution based on your specific requirements.

## About JOS

With over 60 years of experience in Asia, JOS is a systems integrator, solutions provider and technology consultancy with deep and industry knowledge and an exceptional ability to execute. Comprising 2,000+ IT professionals from nine offices across Asia's major business hubs in China, Hong Kong, Macau, Malaysia and Singapore, JOS aims to improve the performance of business and governments across the region by applying the best technology to address their challenges. JOS has extensive experience across a range of industries, boasting more than 10,000 private and public sector customers in Asia, and core capabilities in artificial intelligence, big data, cloud computing, enterprise applications, enterprise security, internet of things (IoT), mobility and next generation infrastructure.

JOS is a subsidiary of HKBN Group ("HKBN" or "The Group"). HKBN Group is a leading Information and Communications Technology ("ICT") solutions provider in Hong Kong, offering a comprehensive range of premier ICT solutions to both the enterprise and residential markets. For more information about HKBN, please visit [www.hkbn.net/en](http://www.hkbn.net/en).
